Appendix A

Hardware and software used

This part compliments what hardware and software have been used if the reader is interested in inspecting and planning for reproduction.

To test the proposed method, experiments has been carried out on a HP EliteBook 840 G5. Detailed hardware and software used in this thesis work are listed as follows.

- Virtual Machine OS: Ubuntu 18.04.5 LTS

- OS of hosting machine: Windows 10 Pro.

- NS3 version: ns3-mmwave built on ns3.29

- ns3gym release 1.0.0 last update on Jun.2020

- OpenAI-baseline

- python version Python 3.6.9

- Hardware of hosting machine:

- CPU: Intel(R) Core(TM) i7-8650U @1.9GHz, 4 Core, 8 Logical processors
